

flex

justify : center : to center the object

justify : flex end -- will shift to the end

align-item

align -content :

to make the 2nd box appear in 1st position and 1st in 3rd we can use ORDER to do the same

put this{order: 3} inside ur css 1st box file

flex-direction

grid template columns

grid auto rows

grid row gap

```
/*----- COLUMN LAYOUT -----*/
.row {clear:both;}

.column{padding: 0 $gutter;}

@for $i from 1 through 12 {
  $w: ($i / 12) * 100%;
  .small-#{$i} {width: $w; float: left;}
}
```
